OF HIS "L" PLANS.

Change to Electric Power Will Be Made Without a Hitch.

DIRECTORS ARE WITH HIM.

Work of Making Improvements ! in the System Left Entirely in His Hands.

George Gould made an additional statement yesterdas regarding the changes to be inaugurated in the Manhattan Elevated Refirond. These changes, as detailed in yesterday's Journal, embrace the subsiltution of electricity for steam engines. faster trains, more of them, and general improvements all along the line. With reference to the time the changes are to ake place Mr. Gould said:

"All that I can promise about that is hat it will commence just as soon as posible, and will be pushed to as rapid completion as men and money can do it. have believed for years that electricity was to be the motive power of the future, and I have wanted to adopt it for the elevated road. It is not true that dissentions smong and objections on the part of our directors have delayed the work we are about to inaugurate. The Board of Directors has been in complete accord with me all along, and they intrusted the entire matter to me. I have known all along that so soon as I decided the time had could not be started until everything was

"While I have had my heart set on this a postponement of action. The work is of

A BATTLE FOR LABOR'S RIGHTS

so great magnitude and importance that it Mrs. George Livingston Baker, Champion of Street Car Employes.

Staten Islanders regard with intense interest Mrs. Baker's fight for conductors and motormen. She says they are overworked, are budly paid and are not treated as if they were Americans. If they complain they are discharged. Mrs. Baker has appealed in valu in their behalf to the vice-president and manager of the New York and Staten Island Electric Company.

The company, Mrs. Baker says, will not over the law that restricts the hours of labor of motormen and conductors to ten. The courts must enforce the law and punish the company, to make it do che and sympathetic. She directs, therefore, a suit of two discharged men against the company. She expected that it would be tried to-day, but the trial will be postponed surely for five days at least.

Mrs. Baker's natural surroundings are not those of the usual reformer. The provocation must be great, since she has become one. Her home on the shore road at West Brighton is happy. Her husband is a successful man of basiness. One of her sons is a veteran of the war against Spain, having served in it as the only energia from Staten Island. Her three daughtors are witty and admired. Mrs. Baker is the cousin of Tom Ameleton, of Boston, whose engrains are celebrated. She is related to the leading families among the exclusives of Nex York's fashionable society.

She says: "I want to prove that this is America still and that there is not man feeling on Staten Island."
